motor abnormalities Lifetime prevalence 1 0 Equal number of men and women  
are diagnosed with schizophrenia

### **Environment and Schizophrenia Environmental Factors in**

December 20th, 2018 - Recent research has provided strong evidence that  
the impact of environmental factors on risk of adult psychopathology is  
mediated by an individual s genotype eg cannabis and catechol o  
methyltransferase<sup>43</sup> and data from the Finnish adoption study<sup>44</sup> provides  
some evidence that the effect of problematic family relationships on risk  
of later schizophrenia is mediated by genetic risk There are currently no  
reported data testing potential gene trauma interactions in psychosis
